

Wound Component & Power Supply Specialists

ISO 9001 CERTIFICATION

What is ISO 9001?

ISO 9001 is the internationally recognised standard for *Quality Management Systems* (QMS). It is the most widely used QMS standard in the world, with over 1.1 million certificates issued to organizations in 178 countries.

ISO 9001 provides a framework and a set of principles that ensure a common-sense approach to the management of your organization to consistently satisfy customers and product standards. In simple terms, it provides the basis for controlled processes and enthusiastic people to deliver a definitive product or service time after time.

It is the responsibility of all employees to ensure that the procedures contained or referred to in the *Gama Electronics Quality Manual* are adhered to and that products supplied and the service to the customer comply with specified requirements. Each employee is responsible for product, service and quality relevant to the task being performed.

A copy of Gama Electronic's Certificate of Registration to the ISO-9001:2015 standard is available on request or on our website.
